## WHAT BROUGHT ON THE BOOM AND WHY IT WILL CONTINUE

(Continued from Page Four)

nel a shaft was driven 100 feet  
straight down into ore. A raise was  
started upward to connect with a  
shaft which had been sunk 65 feet  
from the surface.

When the raise was up seventy feet  
and within five feet of the shaft bot-  
tom, it chipped into the edge of a  
blind ledge of lime carbonate and  
glance averaging at least 25 per cent  
copper. This was only last Friday.  
No work is being done on this new  
ledge, as Superintendent J. A. Hub-  
bard is waiting for instructions from  
his principals. The extent of the  
ledge, of course, can only be guessed  
at.

A gasoline hoist has been ordered  
and a site for it is being graded near  
the collar of the shaft; lumber for  
the gallows frame is on the ground.  
When the hoist is in place the shaft  
will be sunk to a depth of at least  
1000 feet. The plan is to run numer-  
ous drifts and crosscuts.

Surrounded on three sides by the  
United Verde, United Verde Exten-  
sion and Dundee-Arizona, lie the  
28 patented claims of the Jerome  
Verde Copper company. They have  
a splendid surface showing and if  
location counts for anything the  
Jerome Verde will prove to be one  
of the big things of the district.

The principal development to date  
is a 700-foot shaft. A year ago some  
ore was shipped from this shaft.

Several of the principals of the  
Jerome Verde company have recently  
been in Jerome, planning for a re-  
sumption of operations. One of them  
was J. M. Sutton, of Los Angeles,  
secretary of the corporation.

Within a short time a contract  
will be let for the construction of  
2100 feet of road to connect with the  
site chosen for a new shaft, about  
2000 feet southwest of the United  
Verde Extension company's Edith  
shaft. This road will cost about  
\$4,000. When it is completed the  
work of sinking the new shaft to a  
depth of 1,000 feet will be commenced  
at once. As the collar of the shaft  
will be on ground 200 feet lower than  
that of the Edith, the Jerome Verde  
people will be as far down at 1000  
feet as the U. V. Extension people  
were at 1200.

### Copper Chief

Four miles south of Jerome is the  
Copper Chief mine, owned by the  
Hayden Development company.

There was a time when the Cop-  
per Chief people thought that they  
had an immense gold proposition.  
They know now that they have a  
good gold mine but they also have  
a big copper property.

No information has been given out  
regarding the extent or richness of  
the copper deposit opened in the  
lower workings but they have con-  
tracted for the freighting of thirty  
tons daily to Clarkdale, for ship-  
ment to one of the southern Arizona  
smelters. The first copper ore, it  
is understood, will go out in a few  
days.

It was after encountering copper  
ore that the Hayden company sent  
James Wellington Finch to the Cop-  
per Chief to map out a plan of de-  
velopment. It is not at all improb-  
able that big things will be heard  
from the Copper Chief soon.

In the meantime the mill continues  
to treat 125 tons of gold-silver ore  
a day. The ore averages \$3 a ton and  
all comes from above the 160-foot  
level. From that level to the surface  
the ore body averages twenty feet in  
width.

This ore is trammed out through a  
tunnel that taps the shaft at a depth  
of 350 feet.

Superintendent J. T. Matson will  
say nothing about the Copper Chief's  
copper except to admit that a 150-  
foot drift from the 300-foot level is  
in two per cent ore.

The mill, completed in October,  
consists of a cyanide plant with tube  
and ball mills. It saves seventy per  
cent of the gold and silver values.  
E. R. Finlayson is superintendent.

### Shea Copper Co.

Just south of the Copper Chief  
lie the four patented claims of D. J.  
Shea, one of Jerome's leading mer-  
chants. It is to develop these claims  
that Mr. Shea, with his brothers,  
Matt and Tim, and several other  
Jerome associates, have organized  
the Shea Copper company.

Mr. Shea is president of the com-  
pany, with J. P. Connolly acting as  
secretary-treasurer and Nathan  
Schultz as director. Other officers  
will be announced as soon as the  
organization is completed, which will  
be in a few days.

The company is to be capitalized  
for \$750,000. It will have 1,500,000  
shares of a par value of fifty cents.  
Just how many of the shares are to  
be placed on the market has not been  
determined but Mr. Shea says that  
he shall not consent to any of them  
being sold under par. Scores of ap-  
plications for reservations of stock  
have already been received, for the  
claims and their present owner bear  
an excellent reputation among all  
who know them.

The surface showing on the Shea  
claims is much the same as on the  
Copper Chief ground, except that the  
copper values are greater and the  
gold values less. It is not expected  
that the Shea group will prove to be  
a gold mine but there is every in-  
dication that it will become one of  
the notable copper mines of the state.

There are eight or nine outcrops on  
the claims, all carrying copper, gold  
and silver in encouraging quantities.  
About \$5,000 worth of work has been  
done. There are several shallow  
shafts and short tunnels, all in ore.  
In no place has either wall of the ore  
been cut.

### Grand Island

Next south of the Shea is the  
Grand Island group, which consists of  
thirteen claims. There is a good  
prospect that the Grand Island, idle  
for many years, will soon be num-  
bered among the active properties of  
the Jerome district.

The surface showing is much the  
same as that of the Shea and Copper  
Chief. The deepest working is a  
shaft down 200 feet. At 85 feet this  
shaft cuts through a three-foot body  
of sulphide ore. A crosscut had been  
started from the bottom of the shaft  
when the principal owner killed a  
man and was sent to the peniten-  
tiary. This brought about all kinds  
of legal complications which effect-  
ually tied up the property. These  
complications were cleared up princi-  
pally through the efforts of James  
M. Layman and now there is a good  
chance of development being resumed.  
No new equipment is needed as the  
old Grand Island hoist is in ex-  
cellent condition and can be used till  
the shaft is down 600 or 700 feet.

There are several shallower shafts.  
The values in the outcroppings are  
chiefly gold, as at the Copper Chief,  
but copper values begin to come in  
at eighty feet and increase with  
depth.

### North Verde

The four claims comprising the  
North Verde group, lying to the north  
of the United Verde, have been ac-  
quired by the Goodrich-Lockhart com-  
pany, of New York, which is holding  
them under the name of Mowles  
Copper company. It is understood  
that they have delayed the com-  
mencement of development work in  
the hope of securing an option on 51  
per cent of the stock of the Arkansas  
& Arizona, which adjoins the North  
Verde. In the last few days rumors  
have been circulating to the effect  
that this option has been secured  
and that the development of both  
groups is to be undertaken without  
delay. Arkansas & Arizona shares  
jumped from 25 to 32 cents in Jer-  
ome on the strength of the rumor.

### Arkansas & Arizona

The Arkansas & Arizona has one  
of the finest hoists in the southwest,  
and other splendid surface equipment.  
A main shaft is down 1500 feet,  
where there is a good showing of low  
grade copper ore. Experts say that  
the chances for finding a large body  
of commercial ore at a depth of  
about 2000 feet are excellent.

### Calumet & Jerome

Jerome confidently expects to see  
the Calumet & Jerome swing into  
the active list before long. The  
Shattuck people, of Bisbee, recently  
visited Jerome and secured an option  
on the property. It is understood that  
they have also bonded some claims  
owned by Joe Larson and Charles  
Sutter.

The opening of an eight-foot ledge  
of copper-gold-silver ore recently sent  
Pittsburg-Jerome stock from three  
to fifty cents a share. The main  
shaft is down 500 feet and is tapped  
by a tunnel at the bottom. A drift  
is now being run from that point.  
About a month ago the directors of  
the Pittsburg-Jerome company vis-  
ited the property. They are contem-  
plating sinking the shaft to a depth  
of 2000 feet.

### Verde Combination

For the last month James M. Lay-  
man, who was instrumental in form-  
ing the Green Monster company, has  
been working on a deal to consolidate  
six or eight groups in the heart of  
the Jerome district under the name  
of Verde Combination Mining com-  
pany. His plans are progressing well  
and he feels sure that at least six  
groups will be included in the con-  
solidation. News of Mr. Layman's  
plans have leaked out and he has  
already received applications for  
nearly as much stock as he contem-  
plates placing on the market.

Mr. Layman recently returned from  
Pittsburg, where he interested a num-  
ber of powerful capitalists in his  
deal. Several well known Arizonans  
are also interested with him.

### RESOLUTION NO. 174

A resolution of the Commission of  
the City of Phoenix declaring their  
intention to improve certain portions  
of second avenue in the City of Pho-  
enix, and determining that bonds shall  
be issued to represent the costs and  
expenses thereof and declaring the  
work or improvement to be of more  
than local or ordinary public benefit  
and the costs and expenses of said  
work or improvement shall be as-  
sessed upon a certain district and pro-  
viding that the proposed work or im-  
provement shall be performed under  
the provisions of Title VII, Chapter  
XIII, Revised Statutes of Arizona  
1912, Civil Code, and acts amendatory  
thereof.

BE IT RESOLVED BY THE COM-  
MISSION OF THE CITY OF PHOENIX:

SECTION 1.  
That public interest and conveni-  
ence require and it is the intention of  
the Commission of the City of Pho-  
enix, to order the following work to  
be performed, to-wit:

1. That the roadway of Second  
Avenue from the south line of Fill-  
more Street to the north line of Van  
Buren Street (except that portion now  
occupied by the tracks of the Phoenix  
Street Railway Company and two (2)  
feet on the outside of each rail) and

including the intersection of all pri-  
vate drives wherever shown on the  
plans hereinafter referred to and in-  
cluding also such portions of inter-  
secting streets and private drives as  
is necessary to form an easy approach  
to the pavement hereinafter described.

SECTION 2.  
That the said contemplated work or  
improvement, in the opinion of the  
Commission, is of more than local or  
ordinary public benefit, and that said  
Commission hereby makes the costs  
and expenses of said work or im-  
provement chargeable upon a district  
and hereby declares that the district  
in the said City of Phoenix, benefited  
by the said work or improvement, and  
to be assessed to pay the costs and  
expenses thereof, is described as fol-  
lows:

All of Bennett, Simms, Chelsen and  
Kenilworth Additions to the City of  
Phoenix, being bounded on the north  
by the center line of McDowell Road,  
on the east by the center line of Cen-  
tral Avenue, on the south by the cen-  
ter line of Van Buren Street and on  
the west by the center line of Sev-  
enth Avenue, excepting therefrom any  
portion of any public street or alley  
which may be included within the  
above described district.

SECTION 3.

The City Engineer is hereby directed  
to make a diagram of the district  
described hereinabove in Section 2, of  
this Resolution of Intention, to be  
assessed to pay the costs and expen-  
ses thereof. Such diagram shall show  
each separate lot, piece or parcel of  
land in said district and the relative  
location of the same to the work pro-  
posed to be done.

SECTION 4.

The said Commission finds that  
public convenience requires that serial  
bonds shall be issued to represent the  
costs and expenses of said work or  
improvement and said Commission  
determines that serial bonds shall be  
issued to represent each assessment of  
Twenty-Five (\$25.00) Dollars or more  
for the costs and expenses of said  
work or improvement. Serial bonds  
shall extend over a period ending  
nine (9) years from and after the sec-  
ond day of January next succeeding  
the date of said bonds, and an even  
annual proportion of the principal sum  
thereof, shall be payable by coupon,  
on the second day of January every  
year after their date until all is paid,  
and the interest shall be payable  
semi-annually by coupon on the sec-  
ond day of January and July, re-  
spectively, of each year, at the rate  
of six (6) per cent per annum on all  
sums unpaid until the whole of said  
principal sum and interest are paid.

SECTION 5.

The serial bonds herein mentioned  
shall be issued in accordance with the  
provisions of Title VII, Chapter XIII,  
Revised Statutes of Arizona, 1912, Civil  
Code, and amendments thereto,  
and all the proceedings in the afore-  
mentioned improvements shall also be  
taken under Title VII, Chapter XIII,  
Revised Statutes of Arizona, 1912, Civil  
Code, and amendments thereto.

SECTION 6.

The City Clerk shall certify to the  
passage of this Resolution of Inten-  
tion, and shall cause the same to be  
published ten (10) times in the Ari-  
zona Republican, a daily newspaper  
published and circulated in the City  
of Phoenix and hereby designated for  
that purpose.

SECTION 7.

The Superintendent of Streets of  
the City of Phoenix shall post notices  
of said proposed improvement as re-  
quired by law and in said notices  
shall refer to this Resolution of In-  
tention.

Approved April 13, 1916.

GEO. C. YOUNG,  
Mayor.

I hereby certify that the above and  
foregoing Resolution Number 174, was  
duly passed by the Commission of  
the City of Phoenix at a meeting held  
April 13, 1916, and that a quorum was  
present thereat.

FRANK THOMAS,  
City Clerk.

First publication April 17, 1916.

## SAGE TEA PUTS LIFE AND COLOR IN HAIR

Don't Stay Gray! Sage Tea and  
Sulphur Darkens Hair so Natu-  
rally that Nobody can tell.

You can turn gray, faded hair  
beautifully dark and lustrous almost  
over night if you'll get a 50 cent  
bottle of "Wyeth's Sage and Sulphur  
Compound" at any drug store. Mil-  
lions of bottles of this old, famous  
Sage Tea Recipe are sold annually,  
says a well-known druggist here, be-  
cause it darkens the hair so natu-  
rally and evenly that no one can tell  
it has been applied.

Those whose hair is turning gray,  
becoming faded, dry, scraggly and  
thin have a surprise awaiting them,  
because after one or two applica-  
tions the gray hair vanishes and  
your locks become luxuriantly dark  
and beautiful—all dandruff goes,  
scalp itching and falling hair stops.  
This is the age of youth. Gray-  
haired, unattractive folks aren't want-  
ed around, so get busy with Wyeth's  
Sage and Sulphur tonight, and you'll  
be delighted with your dark, hand-  
some within a few days.
